TECHNICAL SKILLS

Languages: Java, C++, SQL (Postgres), JavaScript, HTML/CSS

Backend: JDBC, Servlets, Spring Boot

Frameworks/Libraries: React, Node.js, Express, Bootstrap, Tailwind, Material-UI, FastAPI

Developer Tools/Technologies: Git, GitHub, Maven, VS Code, Eclipse

Database: MongoDB, MySQL

Core Concept: Data Structures and Algorithms, Collections Framework, Exception Handling, Multithreading, REST APIs, MVC Architecture, Object Oriented Programming(OOPs), Operating System, DBMS, Computer Networks

EDUCATION

SRTTC, Pune, SPPU University

Bachelor of Engineering in Artificial Intelligence & Data Science, CGPA-7.10

Pune, Maharashtra

Nov. 2022 – June 2026

ASM (CSIT) College of Science and Info Tech

HSC-Science, Percentage-64.50%

Pune, Maharashtra

Jul. 2021 – Mar 2022

SMC English School

SSC-Maharashtra Board, Percentage-75.50%

Washim, Maharashtra

Jul. 2019 – Mar 2020

PROJECTS

Wanderlust | *Node.js, Express.js, MongoDB, REST API, JWT, EJS, MVC Architecture* | [GitHub](#)

- Developed a full-stack hotel booking web application using with user auth, property listing, and secure booking functionality.
- Implemented secure login/signup with JWT-based authentication and authorization, dynamic routing, and real-time form validation.
- Deployed using Render and Database online on MongoDB Atlas.
- Used RESTful APIs for CRUD operations, booking , reviews and styled responsive UI using HTML, CSS, React.

QuickMeet | *WebRTC, Node.js, Socket.io, Express.js, MongoDB, JavaScript, EJS, Postman* | [GitHub](#)

- Developed a scalable full-stack video conferencing application enabling real-time peer-to-peer communication using WebRTC.
- Implemented secure signaling and real-time messaging using Node.js, Express, and Socket.io.
- Built features such as multi-user video/audio calls, screen sharing, real-time chat messaging, and room-based meeting system.
- Managed backend APIs and database operation using MongoDB, Deployed using on Render.

StockEdge | *Node.js, Express.js, React.js, Material UI, MongoDB, JWT, React Hook* | [GitHub](#)

- Developed a full-stack stock trading platform with secure authentication, buy/sell functionality and real-time stock data visualization.
- Designed and implemented RESTful APIs using Node.js and Express.js for trading operations.
- Built responsive and dynamic UI using React, Tailwind CSS, MUI, and Bootstrap and integrated Chart.js for interactive stock price visualization and analytics.
- Integrated MongoDB for efficient data storage and portfolio management.

ACHIEVEMENTS/CERTIFICATIONS

- Data Structures & Algorithms & Interview Preparation - Udemy.
- Good understanding of Core Java, OOP concepts, Collections, and Exception Handling.
- Implemented CRUD operations using JDBC with proper exception handling.
- Participated in TCS CodeVita Season 12 and Season 13, a global coding competition organized by TCS.
- Sigma 8.0 : Development + DSA + Aptitude - Apna College.
